Powerful all-purpose product – the abrasive sheets KL 371 X

With the purchase of the **abrasive sheets KL 371 X** by Klingspor customers acquire a truly universal product that can also be used as an **emery** tool. This abrasive can always be trusted to process

- metal and
- NF metal

with superb efficiency and speed. The product is particularly attractive to anyone looking for **abrasive sheets** that are affordable without forcing them to compromise on performance. This excellent price-performance ratio makes the product appealing to professional users and do-it-yourselfers alike.

The abrasive sheets KL 371 X – great price, multiple uses

The **abrasive sheets KL 371 X** are a genuine jack of all trades. When used for work on metal, the product affords the user an exceptional stock removal rate. This high-quality product even makes short work of complicated jobs and completes them quickly, reliably and, best of all, at a competitive price. Possible applications include use in the car repair industry or at paint shops. The grain chosen for this product is aluminium oxide, which is made available in grits ranging from coarse to fine. Since they come in a standard width, these abrasive sheets are also a good option for hand sanding. No wonder that the **abrasive sheets KL 371 X** are the tool of choice for many professionals.

Tear-resistant cotton backing for ultimate performance

Klingspor relies on a backing made of **tear-resistant cotton** for their **abrasive sheets KL 371 X**. Contributing to its excellent performance, the X-cotton also gives the product an outstanding service life. The **abrasive sheets** come with a closely coated grain, which is securely bonded in place with glue. This firm bond and the **cloth** backing makes this product suitable for universal use, including use as an **emery** abrasive. This abrasive can be used for both dry and wet.

Width in mm	Length in mm	Grit	Type of coated abrasives	Cat.number
