

PL 31 B Strips with paper backing for Paint, Varnish, Filler, Wood

Applications		Properties	
Paint	●	Bonding agent	Glue
Varnish	●	Grain	Aluminium oxide
Filler	●	Coating	Semi-open
Wood	●	Backing	B-paper
Metals	○		

Klingspor abrasive strips PL 31 B for hand sanding and sanding with handheld machines

The **abrasive strips PL 31 B** offer the decisive advantage of uniform suitability for surface sanding by hand and by orbital sander. Since Klingspor offers these **abrasive strips** in a multitude of sizes, customers can select the size that fits their sanding tools best. The backing is made of B-paper, which allows the user to cut the abrasive paper to the size needed or to easily fold it into the right format. The **abrasive strips PL 31 B** are the perfect tool for surface sanding on

- paint,
- **varnish**,
- filler, and
- wood.

This extensive suitability makes the abrasive papers ideal for **diverse applications** in woodworking and general interior finishing.

Perfect for achieving an ultra fine finish: Abrasive strips PL 31 B

The abrasive strips PL 31 B produce an ultra fine scratch pattern, making them ideal for **finishing** work on **paint and varnish**. The semi-open coating leaves behind enough spaces between the grains to allow for an easy discharge of debris, preventing the surface of the abrasive paper from clogging. The aluminium oxide used as the grain for this product is set apart by its exceptional hardness, which is a key component of the optimised wear characteristics of these abrasive papers. Since this synthetically manufactured mineral is also highly resistant to temperature, it will also hold up well under extreme strain such as use in combination with machinery. The **abrasive strips** are available in various grits, allowing the user to fully exploit the benefits of this robust abrasive paper in any intermediate and finish sanding application.

Klingspor abrasive strips with a strong adhesive bond

The **abrasive strips PL 31 B** by Klingspor are fixed in place with an adhesive bond. The adhesive bond keeps the grain securely affixed to the backing. The backing offers a level of flexibility that makes it ideal for hand sanding. This abrasive paper truly shines when used for sanding rounded edges and other types of curved surfaces.
