**AN 400** Grinding grid for Paint, Varnish, Filler, Gel coats, Plaster, Plasterboard walls, Composite materials, Wood, Wood based materials

Applications		Properties	
Paint	●	Bonding agent	Resin
Varnish	●	Grain	Aluminium oxide
Filler	●	Backing	Polyester screen
Gel coats	●		
Plaster	●		
Plasterboard walls	●		
Composite materials	●		
Wood	●		
Wood based materials	●		

## Klingspor abrasive screen AN 400

The **abrasive screen** AN 400 sets itself apart with its flexibility and its extensive field of real-world applications. The product is suitable for sanding on

- paint,
- varnish,
- filler,
- gel coat,
- plaster,
- plasterboard wall,
- composite material,
- wood, and
- wood-based material.

Its open lattice structure allows for effective and full-surface dust extraction. Dust-free sanding extends service life significantly while improving health and safety at the same time. What is more, users will appreciate the drastically reduced dust formation when working at their work station. There is no dependency on existing suction hole systems Professional users and hobby craftsmen alike will find that the universal applicability of this **abrasive screen** with its **mesh** is of major benefit to their projects.

### The right abrasive screen for every application

Customers purchasing the **abrasive screen** AN 400 acquire an abrasive that is perfect for any application. This suitability for universal use stems from the large selection of available grits: Customers are sure to find the **abrasive screen** that is right for their particular kind of surface refinement as the product is available in versions from coarse to fine. Klingspor relies on premium aluminium oxide grain to allow the product to achieve the best results possible. The backing used is a tear-resistant polyester mesh. This ensures that the product will retain its supreme quality over long periods of use, while its **strips** will process the surface evenly at all times.

### Easy-to-use abrasive screen for the most demanding requirements

Klingspor takes great care to ensure that their **abrasive screens** – just as any other of their abrasives - always combine outstanding performance with exceptional ease of use. The **abrasive screen AN 400** can be mounted on all standard orbital sanders and used for surface sanding. Since it is **self-fastening**, the screen can always be attached to the tool quickly and with utmost ease and reliability. Aside from offering expert advice and an extensive in-stock product selection, Klingspor also provides customised solutions that are tailored to their customers' needs. The product dimensions can be adapted to each specific application and to the machines the customers requires. Reflecting Klingspor's policy of maximum customer satisfaction, these services ensure that the company's products will meet even the highest standards.
