

MaxiCut[®]

OIL[™]

proRange[®]

MaxiCut[®] Oil[™] combines cut protection with comfort, flexibility and dexterity for oily and wet environments.

Certified to be washed.
CLEAN, FRESH AND COST EFFECTIVE

TECHNOLOGIES INSIDE

For protection against cuts

Innovative fibres - CUTtech[®] combines and blends high performance yarns and fibres to impart different levels of cut protection with the driving philosophy to deliver high levels of comfort and wearer satisfaction.

Reinforcement - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.

For protection against oils, liquids and chemicals

Liquid repellence - through use of two technology platforms, layered on top of one another, we have ensured increased resistance to oils via our LIQUtech[®] technology platform.

Longer use saves you money

DURAtch[®] is a technology platform that makes gloves last longer. Why? Because long lasting gloves simply makes good economic sense but it's not all about the durability. It's also about making sure your gloves are fresh and clean so we've designed our gloves so they can be laundered. That way you're able to make full use of the outstanding durability offered.

For reduced hand fatigue

Form, fit and feel - mimics the "hand at rest", reducing hand fatigue and increasing comfort.

Latest knitting technology - utilized to produce smooth and rounded fingertips, improving fingertip sensitivity.

Consistent liner penetration - from the nitrile, leaving only the soft liner resting against the skin.

For better performance

Optimized grip - delivered through our micro-cup finish, allows for a controlled grip. GRIPtech[®] decreases hand fatigue and increases safety.

CLEANLINESS GUARANTEED

We use our HandCare[®] Program for every single ATG[®] product. Not only do we make certain that all the elements used in our manufacturing process are safe for our employees, we also wash all the gloves after the production process as a further step in ensuring cleanliness. During this laundering process, we prefer the use of water that is rain-harvested, treated and continually recycled from our own water treatment facilities.

This enables us to guarantee our gloves to be "Fresh out of the pack" which is certified by Oeko-Tex[®] according to Standard 100. We do not use any SVHC during our manufacturing process.

And if that wasn't enough our gloves are also dermatologically accredited by the Skin Health Alliance. The Skin Health Alliance seal gives, for the first time in the safety industry, professional glove users the confidence that ATG[®]'s full range of gloves are "dermatologically safe" and the science and research behind them is robust.

More information about HandCare[®] by ATG[®] is available at www.atg-glovesolutions.com.
